SUMMARY

Results-driven Backend Developer with 3 years of experience building scalable, high-performance web applications and APIs. Specialized in backend system design, microservices architecture, and real-time communication. Work on systems serving 15,000+ active users, focused on delivering secure, efficient, and reliable solutions aligned with business needs.

EXPERIENCE

Backend Engineer (Full-Time)

May 2025 – Present

Madkhol

Cairo, Egypt

- Built and maintained backend services for an investment & robo-advisory platform using microservices.
- Implemented portfolio management, investment strategies, and financial analytics.
- Engineered Ratbi Plus, a B2B corporate investment product enabling company employees to invest through their employer — with HR-managed dashboards for onboarding, allocation, and oversight.
- Improved API performance by **30%** via query optimization and caching.
- Fixed **30+ critical bugs**, reducing transaction errors by **40%**.
- Maintained internal APIs and service-to-service communication.
- **Tech Stack:** Node.js, NestJS, Express, Python, FastAPI, MySQL, MongoDB, Redis, Docker, Kubernetes, RabbitMQ, GitHub Actions.

Backend Engineer (Full-Time)

Oct 2024 – May 2025

BasicsEngage

Remote

- Integrated **GPT-3.5 Turbo** for AI-powered email generation serving **1000+ users**.
- Built Zapier integrations supporting **150+ monthly automation workflows**.
- Designed backend APIs for AI-driven and automation features.
- **Tech Stack:** Node.js, Express.js, MongoDB, Redis, Docker, AWS S3, AWS SES, WebSocket, OpenAI API, Zapier.

Backend Engineer (Full-Time)

Jul 2023 – Oct 2024

Appgain.io

Cairo, Egypt

- Optimized Appgain Notify Server, achieving **50% faster response time**.
- Developed backend features for Toki social app, including auth, payments, virtual gifts, and real-time communication (WebSockets).
- Built AWS Uploader WebSDK for secure S3 uploads with retries and progress tracking.
- Developed two e-commerce SaaS platforms: **Peak** (pharma) and **Marraksh** (perfumery trade) — covering auth, orders, invoices, product catalog, and analytics.
- **Tech Stack:** JavaScript, Node.js, Express.js, Python, Flask, MongoDB, Redis, Prometheus, Docker, AWS.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C Sharp.

Frameworks: Node.js, Bun.js, Express.js, Nest.js, FastApi, Flask, Django.

Databases: MongoDB, PostgreSQL, MySQL, Mongoose, TypeORM, Prisma, Sequelize.

DevOps Tools: Git, GitHub, GitLab, Bitbucket, Docker, Linux, Redis, AWS, Bash Script.

Real-time Communication: Socket.io, Pusher.

Tools: Postman, Swagger, GraphQL.

EDUCATION

Mansoura University

Bachelor of Computer and Information Sciences, Software Engineering.

Mansoura, Egypt

2020 - 2024
